

Spesifiser Ditt Skalerings Alternativ Før Du Tar Utskrift. På dialogboksen "Skriv ut", skal Sideskalering bli satt til "None", zoom på 100%. (Du kan åpne boksen ved å trykke CTRL + P)

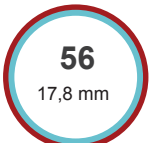

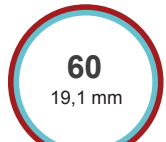

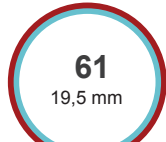

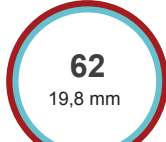

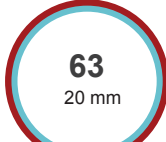

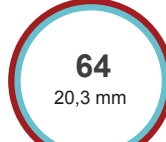

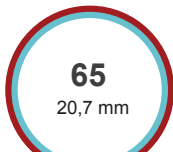

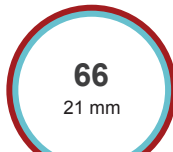

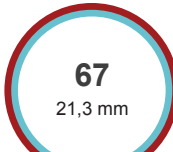

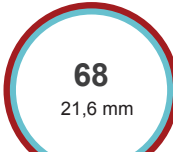

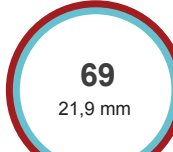

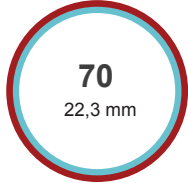

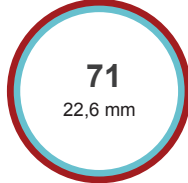

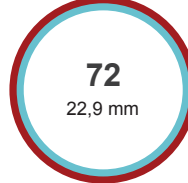

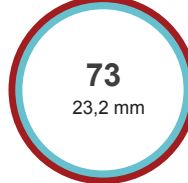

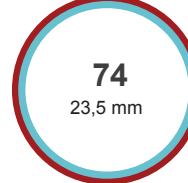

Mål verifikasjonslinjen med en linjal for å bekrefte nøyaktigheten, som må være 3 cm, 30 mm lang.

Mål Din Eksisterende Ring

Om du har en ring som passer deg helt perfekt, kan du finne din størrelse ved å legge ringen din opp på sirklene under. Når du har plassert ringen din, vær sikker på at innsiden av ringen din passer akkurat (til den blå sirkelen) uten mellomrom. Den røde sirkelen skal ikke synes når du ser på ringen vertikalt fra toppen. Om ringen havner imellom to størrelser, anbefaler vi at du velger en størrelse større.

Du kan legge ditt kredittkort/bankkort for å bekrefte nøyaktigheten.

Disse målingene henviser til indre **diameteren** til ringen.
